

The **ISOLIBER 25B-15** wall panel is specially designed as lining for accommodation projects.

The core panel is a high-density rock wool of 150 kg/m³, lined on both sides by a 0,7 mm thickness galvanized sheet finished with a decorative low flame spread PVC foil on visible face. Colours according with project.

The size for NAVALIBER-ISOLIBER panels is as per client requirements, being remarkable not only because of the lightness, easy to move and strength, but also because of their acoustic and thermal insulation.

PG-01 Supporting profile

TECHNICAL FEATURES	25B-15
Linings	0,7 mm
Standard finishing	150 µm PVC film
Insulation	rock wool
Standard width	600-935 mm
Thickness	25 mm
Weight	16 kg/m ²
Classification	B-15

PM-01 Joint panel
